Can Tho, Vietnam

Work Experience

Fresher Node.js Developer (Remote) at Maxlancer PTY LTD

- Implemented Database schema with Prisma
- Implemented RestAPI server, GraphQL server APIs with Node.js
- Integrate online payment method with Stripe

Australia, Dec 2018 – Aug 2019

Education and qualifications

- Major: Information Technology Engineer at CanTho University
- Sep 2016 – Present | GPA: 3.29/4.00

Skills and Achievements

- *Languages: Javascript, Java, C/C++, Python*
- *Databases: Mysql Server, Redis, Mongodb*
- *Platforms: Ubuntu, Git*
- *Others: Docker*
- *Basic: Cloud platform*

Personal Projects

- **Vietnamese language model:** Implement language model word level, using LSTM combined with “Attention” mechanism then use the BeamSearch for the word generator. The model was training on the Vietnamese papers dataset.
- **Chat system clone inspired Zalo (Prototype):** Conceptually, it’s based on the usual online chat system, but it’s restructured based on some the-state-of-the-art technology such as (Apollo.js, GraphQL, React.js, Mongodb)

Freetime and activities

- Interested in object-oriented programming, Data structure and Coding challenges
- NLP Research about LSTM and Transformer
- Interested in system architecture design and database design
- Very interested to support teammates

Participations

- AWS HackDay 2017, implement an application using AWS services
- Zalo AI Hackathon 2019, Ranked 7/65 teams
- Shopee Code League 2020
