QUANG-SANG LE

Phone: +84 968.353.293 (VN) Email: sang.lequang94@gmail.com Github: sangqle

Personal Detail

• Name: Le Quang Sang

• Gender: Male

• Date of Birth: March 12th, 1997

• Address: Street 3-2, Xuan Khanh Ward, Ninh Kieu District, Can Tho City

• Language profiency: English

Education and qualifications

• Major: Information Technology at CanTho University

• Septemper 2016 – Present

Skills and Achievements

Programming Languages:

• Javascript, Typescript, Python, Java

Database Management Systems:

• Prisma, Mongodb, MySQL Sever

Redis

Others:

• Graphql, RestfullAPI, React.js

• Docker container

• Stripe online payment APIs

Ubuntu

Version Control:

• Git, GitHub

Soft Skills:

• Teamwork, Business communication

- Fundamental Cloud services: Heroku, Azure
- Implemente Graphl server with Appollo.js
- Some things about Keras, Tensorflow

Project

Position: NLP Reseacher

Project: Language model with LSTM

Description: Language model word level, using Word2vec's pre-trained model to represent the word in vector and LSTM to learn the hidden state put together with the Attention mechanism then use the Beam for the word generator. The model was training on the Vietnamese papers dataset.

Jan 2020 – Present

Position: Full-Stack

Project: My-Chat (Prototype)

Description: Conceptually, it's based on the usual online chat system, but it's restructured based on some

the-state-of-the-art technology such as Apollo.js, Graphql, React.js, Mongodb...

Dec 2019 – Present

Position: Full-Stack

Project: Scabin Code Editor (Prototype)

Description: An desktop application based on Electron framework for easy access local file and build cross

platform desktop apps. There are basic features of an editor such as highlightin syntax with CodeMirror

Dec 2019 – Present

Position: Back-end developer **Project:** Online Booking

Description: An case study of Database Management System on Web-based for movie ordering in the cinema and integrate Google Pay for online payment system, check in order with generator QR code. Using Reactjs for client-slide and Nodejs for APIs and My SQL Server.

Dec 2018 - Nov 2018

Work Experience

Maxlancer PTY LTD Australia
Fresher Intern Node.js Developer Dec 2018 – Aug 2019

- An online hiring and working platform
- Dedicated to mechanical engineers
- Project management

Pastimes and activities

- Reseacher about NLP
- Practice coding challenges on Codesignal, LeetCode
- Interested in system and database design architecture
- Regularly complete courses on Freecodecamp
- Excited to attend tech evnets such as VietNam mobile day, Zalo AI hackathon, AWS hackday...
- Support to solve coding issues in stackoverflow

Participation

Contest: AWS HackDay 2017

Project: OPI Pay

Position: Back-end developer

Description: An application using AWS services, login by phone number with out password and using AWS rekognition using face for payment, authentication system instead of password or phone. Using Reactjs for client-slide and Nodejs for APIs, DynamoDB for database

Contest: Zalo Al hackathon 2019 (Fresh Participants)

Project: Ninedash Recognition

Description: Model identifies whether or not the ninedash in the image.
